

Care & Maintenance of your Woca Oiled Wooden Floor

One of the big advantages of your Floor is that it is so easy to keep spotlessly clean. While your flooring is resistant to stains & abrasions, it is not indestructible. In order to maximize the durability of your floor we recommend the following as part of your normal care & maintenance:

- Place a doormat outside the exterior entrance to collect excess moisture, sand, grit etc. Spillage won't mark your floor provided that you wipe it up immediately. Don't allow water to lie on the floor.
- Blot up spills, or water from wet feet or footwear
- Use protective felt pads under furniture legs and avoid sharp or pointed objects with concentrated weight on one spot.
- **First sweep** before you mop the floor – use 125ml **Woca Natural / White Soap** in 5L bucket lukewarm water. Squeeze mop properly, it must be JUST damp - mop towards yourself to avoid smearing dirt over clean areas – Ideally use 2 buckets one with soap water & one with clean water for rinsing out . (See instructions on backside of cleaner)
- Dry floor with a clean soft cloth
- Remove persistent stains with Woca Spot Remover
- As an annual maintenance treatment the floors should be treated with **Woca Maintenance Oil** – it refreshes the floor's finish while removing marks, dirt & other grime. It is easy to apply & retains the matt finish

DONT'S

Do not allow excess liquid to remain on the floor's surface

Do not use soap-based detergents, abrasives cleaners or "clean and shine products that wax or polish

Do not use steel wool or other scouring pads that may scratch

Do not steam clean or use chemicals that may damage the floor surface

Woca products are highly concentrated strong acting cleaners especially for oiled wood floors. They can be obtained from Eurofloors Knysna. 044-3827876 showroom
